WHO AM I AS A DATA ANALYST?

Hello dear reader,

My journey into data analytics began with the completion of the Google Data Analyst Certificate, a pivotal moment that opened the door to my first professional role at Volkswagen Financial Services. This position marked the discovery of my deep passion for data, whether it was designing insightful visual reports or automating complex processes to enhance efficiency. The hands-on experience I gained during this time was invaluable, as it sharpened my ability to transform raw data into meaningful insights and optimize operations for better decision-making.

While at Volkswagen, I also completed my Bachelor's degree in International Business, which provided me with a broader understanding of global business dynamics and deepened my analytical skills. This academic milestone complemented my professional development and guided me toward exploring new opportunities within the automotive industry, giving me a more well-rounded approach to tackling complex business challenges.

Today, I continue to apply my expertise at DODO, where I hold a dual role. As a Platform Developer, I focus on building efficient and scalable automation solutions that streamline internal processes. In addition, as a Data Quality Analyst, I am responsible for ensuring that our data remains accurate and that our reports are both reliable and user-friendly, empowering the company to make confident, data-driven decisions. My current position allows me to blend my technical skills with my business acumen, making meaningful contributions to the organization's success.

EDUCATION

Metropolitní univerzita Praha 🎓	2020 - 2023
Bachelor's study program: International Business studied in English	

Vyšší odborná škola zdravotnická a Střední zdravotnická škola 5. května, Praha	2015 - 2019
Medical Lyceum graduated with honors language exam B2 (English - FCE)	

WORK EXPERIENCE

DODO Czech   June 2024 - Now

Data Quality Analyst

- My work primarily involved data quality control and validation at the source, in the database, and subsequently in reports.
- Checking the logic of models in Power BI and testing them from both a user and technical perspective.

TechData SYNNEX, Prague   March - June 2024

Data Analyst/Scientist

- Member of marketing team oriented towards contact targeting. Working with Snowflake and Azure DevOps, Git, Azure Databricks and extended work with Excel (VBA).

Volkswagen Financial Services   July 2022 - February 2024

Data Analyst

- DWH orientation and data analysis/manipulation via Power Bi. Coding in VBA (Excel) in order to automate business tasks. Reporting from AS400 and MS SQL Server. Developing new procedures and automative tasks.

Footlocker   October 2018 - January 2021

Sales associate

- Customer care, communication in a foreign language on a daily basis (primarily English, occasionally French, branch in Palladium), replenishment of goods, registration of goods in the system. Training systems focused on marketing and customer care
